

Can I send email with my own address/domain?

Yes, this is possible.

It can be ensured that if you send an e-mail from PlanManager, the sender no longer receives m@mail.planmanager.be but for example info@pm.yourdomain.com.

This takes some time to set up. The reason is that between your own mail server and the PlanManager mail server a number of settings have to be set correctly. To make this possible, your IT department should contact support@insypro.com. You can do this in PlanManager via the Help -> Contact tab.

If a private domain is used there will be 10 euro credits charged each month.

Unikátní ID: #2049
