

# How do I remove a courtesy car?

You can not actually delete a replacement car. You can only set the car as inactive, so it won't be visible in the planning anymore. The rental history of the vehicle will always remain available.

You can set a vehicle to the inactive status by going to the tab "car fleet" - "courtesy car". Click on the vehicle. Then click "→ Show more details" and finally

click **Change vehicle to INACTIVE**

**Courtesy Car**

Location: Deans Body Repair
