## Automatic Time Registration (Workshop). The automatic time registration (Workshop)

Automatic time registration (ATR) is a system in which employees can register on tasks which they are going to work on. It is in fact a modern version of a timer. This component is fundamental to the program. The recorded data will be used in reporting and is visible on the particular job so that you have an overview of the hours worked by your employees.

The screenshot shows the PlanManager interface. On the left is a navigation menu with options: COMMUNICATION, HELP, WORKSHOP (selected), JOB, PLANNING, REPORT, MAINTENANCE, SYSTEM, RENTAL, and INVOICING. The main area displays a grid of employee status cards for a 'Self-governing workshop'. Each card shows the employee's name, profile picture, and current task. A legend below the grid explains the status indicators: a person icon for 'Employee has checked in', a person icon with a checkmark for 'Employee is ready to work according to his/her work schedule', a grey card for 'Employee is absent according to his/her work schedule', a green bar for 'Employee is currently working on a task', a red bar for 'Employee is currently working on a non-productive task', and a red bar with a clock icon for 'Total clocked time almost exceeds time estimated'.

Each employee has its own field on the main screen of the ATR. If an employee wants to use the system, he must register on his block. On the screen which is then displayed he can find the current tasks and the jobs he can work on. If using the planning, these tasks will also display here.

The screenshot shows the ATR interface for the user 'ALBERT EINSTEIN'. At the top, there is a search bar and a filter. The interface is divided into three main sections: 'Running Tasks', 'Planned Tasks', and 'Active Jobs'.  
 - **Running Tasks:** Shows two tasks. The first is 'Panel beating' for block 9900, registration 1EUU310, model TIGUAN, starting on 07-01-2019 at 08:06, with a status of 'In Progress'. The second is 'Cleaning' for block 10439, registration 1WEF429, model GOLF, starting on 29-01-2020 at 13:00, with a status of 'In Progress'.  
 - **Active Jobs:** Shows four job cards. Job 8712 (1ABC123, BMW X3, owner AARAO BRAZ RUI, colour ZWART). Job 9490 (1GKR636, BMW 520D, owner CARROSSERIE VAN..., colour zwart, paint type dajl). Job 9604 (1BOV523, MITSUBISHI CWB, owner JORIS TEEUWEN, colour zwart). Job 9681 (1ABC456).

## 2.1 Starting a task

Files, tasks and activities are displayed as blocks. These blocks are clickable and are distinguished by color. To start a planned task (yellow) click the desired block. That block disappears from the part of the planned tasks appear in the section running tasks (red).

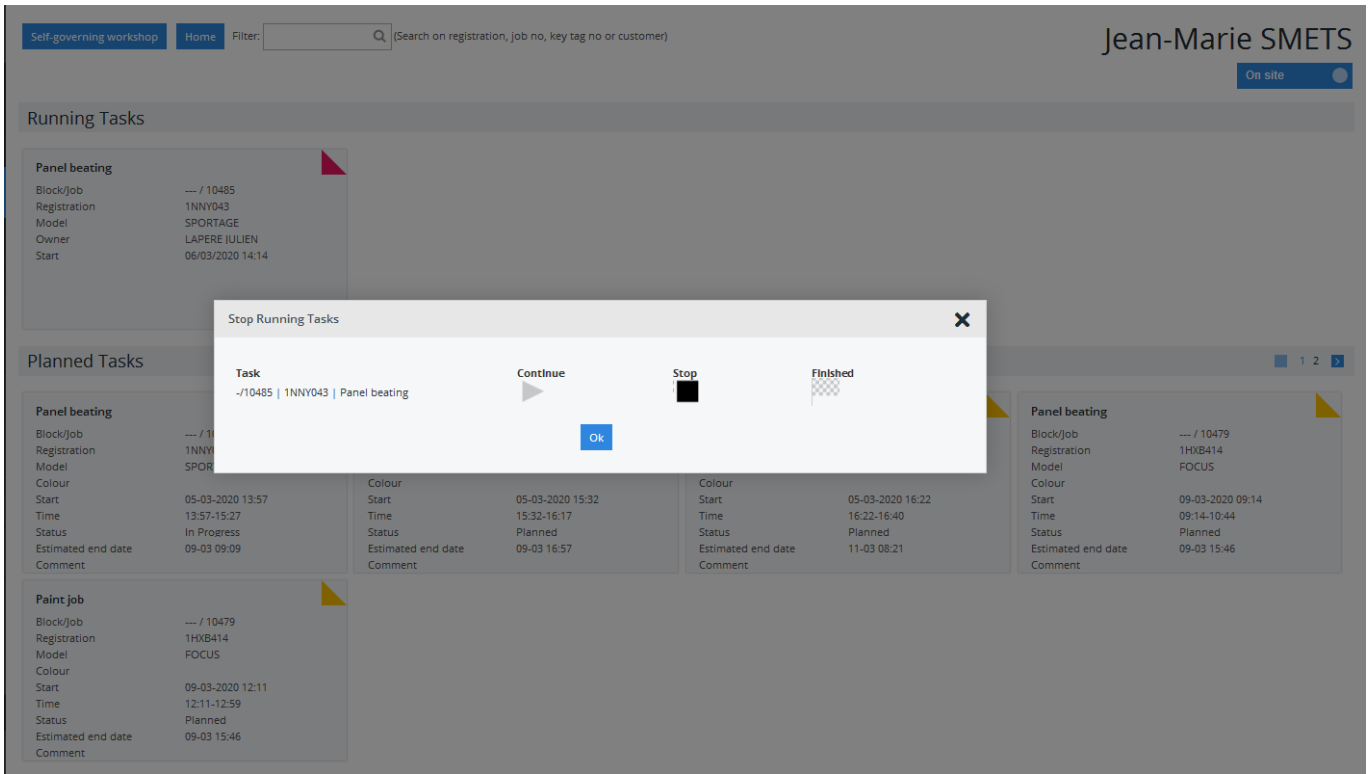

For starting an unassigned task click the active claim you want to work on (blue). Then you will see a list of all the tasks in that file. Again, using colors:

- red: finished task - you can not click here.
- Orange: task in execution - This task is already in progress, but one can still click to collaborate.
- Green: task not yet in progress - tap to start the job. The tasks are in order so it is usually so that you have to click the first green block, but it is possible to click on a subsequent task.
- gray: the job is on hold (suspended) - employees can not click here. This status can be assigned to a task in the job management. The reasons for doing so are varied. (lack of parts, a dispute with the customer, no permission, etc.)

After 30 secs the screen will return to the home screen.

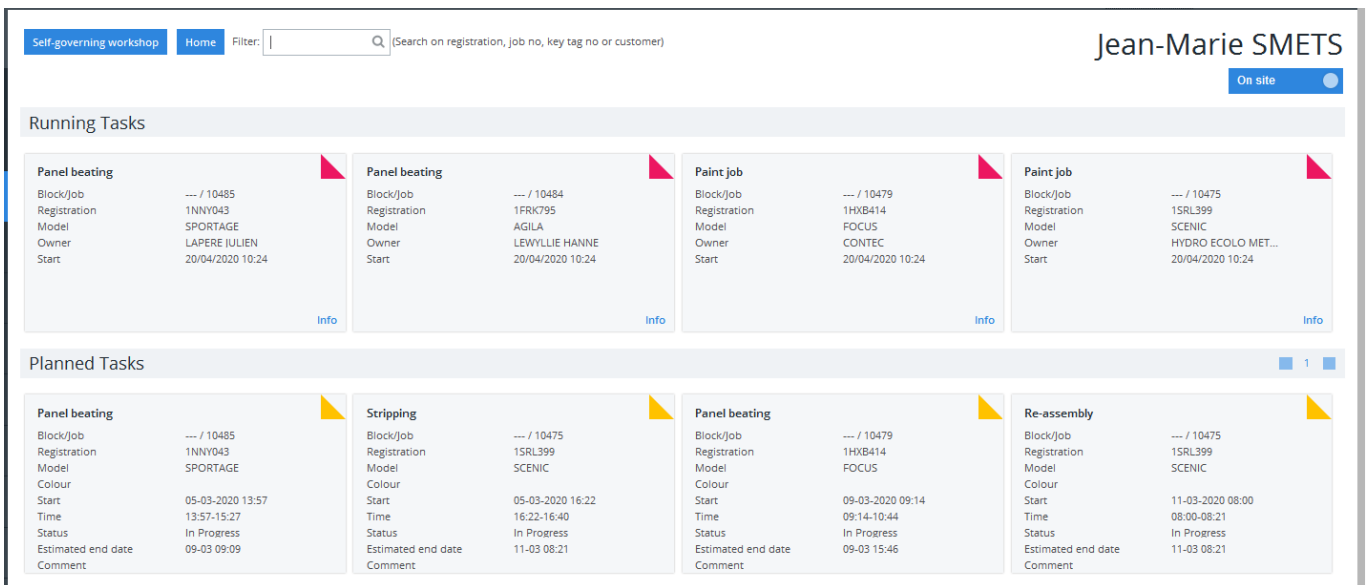

## 2.2 Stopping an activity

When you want to stop an activity, you must click on your block in the home screen and then click on the running task. On the next screen you will be able to click on "continue" if you clicked by accident on the wrong task click on "stop" if you want to stop working on this task, but will restart later on the same task, and "finished" if the job is completely finished.

## 2.3 Multitasking

You can simultaneously work on multiple activities. The time you spent, being distributed on the tasks you are working on at the time. This can be very useful if the same operations must be done for different cars..

If you are registered on multiple tasks, you will see an + X to indicate how many additional tasks you are registered on, without counting the first task.

## 2.4 Cooperation

It is possible, in PlanManager, that two or more employees work on the same task.

## 2.5 Reporting

You can find the reports for the clockings by going to “Report - Management - Time Registration”

The screenshot displays the PlanManager reporting interface. At the top, there are navigation tabs: Dashboard, Financial, Operational, Management, Other, and Scheduled. Below these are filter options: Summarized, Default, Absence, Presences, Overtime, and Productivity. A 'Filter' sidebar on the left includes sections for Location, Personnel, Job, Tasks, absence, Deleted tasktypes, Inactive personnel, and Activities. The main area shows a list of employees with their scheduled hours and absences:

Employee Name	Scheduled Hours	Absence Hours	Total Scheduled Hours
JEANNE D ARC	404h00	8h00	396h00
CHARLES DE GOAL	426h00	38h00	388h00
MAGGY DE KLOK	404h00	8h00	396h00
C EASTWOOD	404h00	8h00	396h00

A notification message box at the bottom right reads: NOTIFICATION MESSAGE test communication.

Here you can filter by location, user, job, tasks, date, etc and get these figures in an excel.
