# Versions 2022-05 may

### Workshop applicatie multi-user

When using the workshop app where multiple users are logged in, the first user to be registered in the app will be the 'admin user'. Until now, there was no indication anywhere in the app who this admin user is.

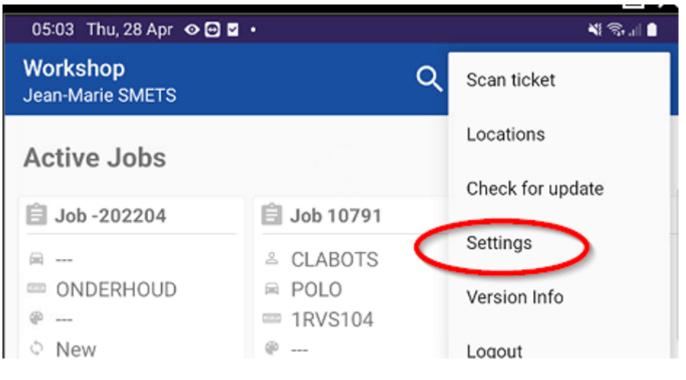

From the next release, of the workshop application, the name of the admin user of the workshop app will appear in the settings – Version info. This user can add/remove other users.

### Settings workshop application with multiple users

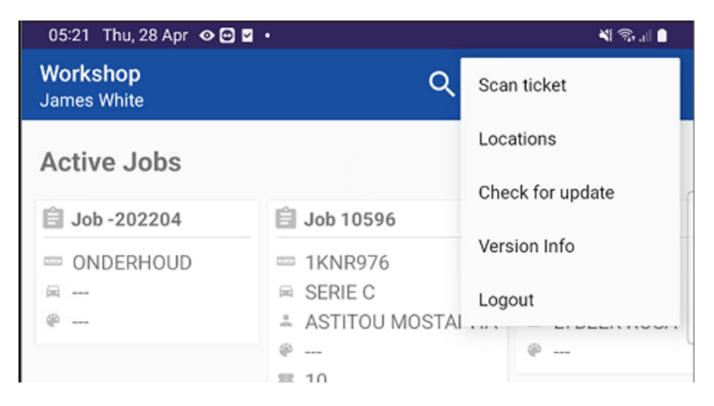

From the next release of the workshop application, the settings can only be managed by the admin user. The admin user is the first person to be registered in the workshop app. As described above, after updating the app to the latest version, you can find the admin user under 'settings – version info'.

If only 1 user was registered in the workshop application, the settings are all visible to this one user.

Admin user:

#### Regular user:

#### Extra log - change repair type

From now on, a new log was added. It is now possible to see in the logs when a

Seite 2 / 5 (c) 2025 InSyPro <christof@insypro.com> | 2025-07-03 12:26 URL: http://faq.insypro.com/index.php?action=artikel&cat=102&id=1496&artlang=de

repair type has been changed. You can adjust a damage flow type by going to the damage details in the PlanManager job.

₽	¢ځ	i	5	2	P	žΞ	Ħ	<b>(</b> 3)		S	ŧ	0

### Additional fields damage details job

2 additional fields were added to the damage details of the job. You can now indicate on which date the calculation was created and on which date the estimation was approved.

Damage details	×
Incident date	Repair type
	1 day Smart Standard
14-04-2022	Yes No
Date authorised	Point of impact
	Choose the first point of impact 🗸
Total loss	Damage cause

You can find these fields by going to the damage details in the job.
