

006. Rental Usual Driver.

Usual driver

When you enter a usual driver to a rental car, that person will receive a SMS as a reminder when the replacement car is reserved or coming back from a reservation.

The screenshot shows a configuration form for a 'Usual Driver'. On the left, there is a link 'Show more details.' with a double arrow icon. Below it are several input fields: 'Greencard nr', 'Excess' (with a '£' symbol), 'UsualDriver' (a dropdown menu showing 'JM Smets'), 'Insurance' (a dropdown menu showing 'BA'), 'Greencard duedate' (with a date '28-02-2017' and a calendar icon), and 'Coc duedate' (with a calendar icon). On the right side of the form, there is a list of options: 'Mileage', 'Checkup Interval Months', 'Checkup Interval Days', 'Winter Tires', 'Summer Tires', 'All Season Tires', and 'Damage'. Two green arrows are overlaid on the image: one points from the top right towards the 'Show more details.' link, and the other points from the right towards the 'UsualDriver' dropdown menu.

To set this, go to System - Options and search:

'SEND_USUAL_DRIVER_START_REMINDER_SMS (at the start of a reservation) or
SEND_USUAL_DRIVER_STOP_REMINDER_SMS (at the end of a reservation).

If this configuration is set to "always" , the usual driver will automatically get an SMS .

You will be sent a standard SMS. You can adapt this text in the screen
Administration - Comm. Templates.

Before, an email was also sent to the usual driver at the start / cancellation /
modification of the reservation. You can see this email in the communication screen
in the block of the reservation. You also can change this text in the screen
Administration - Comm. Templates.
