General - How can I determine if my app is the latest version?

It is possible to check if the applications Inspector3, Reception and Workshop on your tablet(s) are the most recent version or not.

Active since	Last Communication	Version ▲	Access To	Status
		1903041413	workshop	Active
		1903041413	workshop	Active
		1904031156	workshop	Active
		1904121109	workshop	Active
		1904121109	workshop	Active
		1904121109	workshop	Active

Maintenance -> Tablet -> Devices

Applications in a red coloured version number are required to be updated. If you hover on the version number you also will see what the current status is. If red, you will get the message "This is not the latest version, please update the application"

	1903041413	workshop	Active
	1904031156	workshop	Active
	1904121109	This is not the latest version, please update the application.	
	1904121109	workshop	Active

Applications in a green coloured version number are not required to be updated. If you hover on the version number you also will see what the current status is. If green, you will get the message "This is the latest version."

	20171010	inspector	Active
	1903041413	workshop	Active
	19010709	This is the latest version.	Active
