How to send a vehicle to the workshop

Send a vehicle to the workshop

The goal is to enter the vehicle in the workshop so that employees can begin the repair of the car and clock on the different tasks.

First you must locate the vehicle in the job list.

Job tab - List of jobs: type the license plate (or part - minimum 3 characters) in the filter field and hit the <Enter> key to open the job in question.

In order to put a vehicle in the workshop, 3 conditions must be met:

- 1) Tasks must exist for the job.
- 2) The vehicle must be present in your body shop.
- 3) An estimate must exist for which the "RO" button is enabled, and all tasks cannot be completed.

The screenshot displays the PlanManager software interface. The top navigation bar includes tabs like Job List, Claims360, Order list, Job Queue, Auditors, Deliveries, Offer Requests, Stock, Ubensh, Scale, Vat Book, DMS, Albatros, Driver2, Carpass, Calendar, and Carcan. The main content area is titled 'Job # 10962' and shows various fields for vehicle information, including Location, Registration, Make, Model, Type, Model year, VIN, Colour, Mileage at Photo shoot / at Repair, First registration, Vehicle details, Comments / Damage, Key Tag Number, Photo / in, Repair appointment, Vehicle in, Vehicle in date, Ready to start, Planning, Start / End, Estimated end date, Client informed, Book out date, Off site date, Current Task, and Status. A red circle '1' highlights the 'Vehicle in' field. Below the job details, there is a 'Tasks' table with columns: Type, Comment, Work Units, Minutes, Rate, Amount, and Status. The table lists several tasks such as 'Stripping', 'Panel beating', 'Preparation', 'Paint job', 'Re-assembly', 'Waxing in & out', and 'Final quality check'. A red circle '2' highlights the 'Tasks' table. At the bottom right, there is a 'Near Activity' section with a table showing job order details. A red circle '3' highlights the 'RO' button in the bottom right corner of the interface.
