

Reception app

Reception app - Can I measure the condition of the damage car/courtesy car?

The condition of the car can be measured by taking photographs according to a fixed step-by-step plan. The app will guide this by asking the right photo step by step.

The different steps are as follows:

1. Rear
2. Rear left
3. Left side
4. Front left
5. Front
6. Front right
7. Right side
8. Rear right

This function is off by default. This can be turned on in the settings. It can be enabled for the damage car and / or courtesy car. Once it is enabled, it is also possible to indicate whether validation checks should be done or not.
