

## **Workshop app**

# **Workshop app - Can I view/filter through jobs of multiple locations?**

When a personnel has no Location linked, the jobs of all Locations will be shown by default. To increase the flexibility a filter button, the icon of a building, is shown at the top of the overview screen. When there is not enough space (on a mobile phone for example) the filter button will be in the menu (the 3 dots button). When opening the filter the user has the possibility to select one or more locations to filter through.
