## How do I change my invoice numbers?

### Introduction

Invoice numbers in planmanager are linked to the journal. You can have multiple journals.

### Customizing

You can find a list of all your journals in the Invoice menu - Journals.

The screenshot shows the PlanManager interface. On the left is a sidebar with various menu items. The 'INVOICING' menu item is highlighted with a red box. In the top navigation bar, the 'Journals' tab is also highlighted with a red box. An arrow points from the 'INVOICING' menu item to the 'Journals' tab. The main content area displays the 'Journal Editor' form on the left and a table of journals on the right.

Click on a line to edit a journal. The last number field holds the last invoice number that was distributed. This means that if the last number is 1003, the next invoice will be numbered 1004.

This screenshot is similar to the previous one, but the 'Journals' tab is selected in the top navigation bar. The 'Journal Editor' form on the left shows the 'Last Number' field with the value '6125260' highlighted by a red box. An arrow points from this field to the corresponding row in the journal table on the right.

## On January 1, I change my numbers for the New Year

Your current number sequence is 201700605. However, you want the first invoice of 2017 to start at 201700001. You can simply modify your existing journal by putting in 201800000 to number your next invoice to 201800001

# Invoicing

## On January 1st I change my numbers back to 1.

An invoice number must be unique by definition, did you use for example invoice numbers 1 to 605 in 2017, you can't use these numbers in 2018.

You will then need to rename your journal in 2017 and create a new journal by clicking the new button. That way you can use the same invoice numbers again.
