### Vehicles inside

It is important that vehicles are always 'marked off site' after completing the jobs. If the cars remain marked as 'in' in PlanManager, this can have an influence on the performance of the ATR screen and the workshop application. In the background, all cars will always be loaded with the check mark 'vehicle in'. It is therefore important that all cars are deregistered for the sake of performance but also for the proper follow-up of the VAT book.

You can unsubscribe a car that has checked the 'vehicle in' checkbox by pressing the clock at the date of collection. PlanManager will then automatically uncheck the 'vehicle in' checkbox.

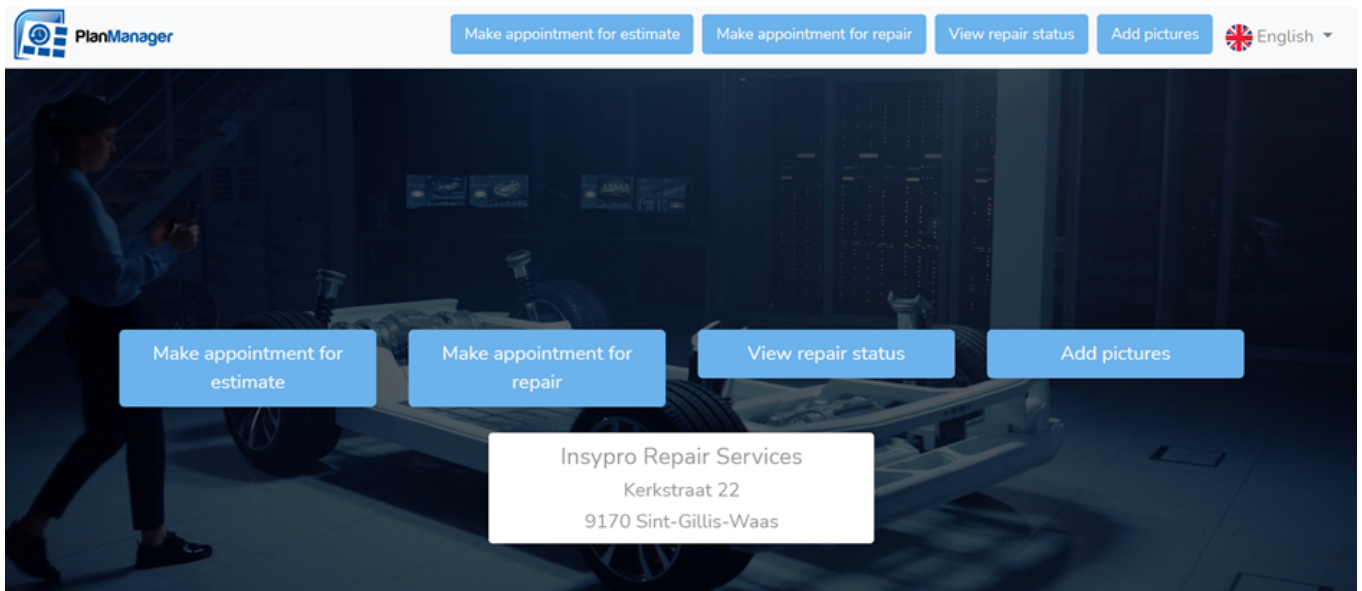

Colour	<input type="text"/>	Start / End	Unknown → Unknown	
Mileage at Estimate / at Repair	<input type="text"/> / <input type="text"/>	Est Comp Date	<input type="text"/>	<input type="text"/>

Vehicle details	<input type="text"/>	Book out date	<input type="text"/>	<input type="text"/>
Comments / Damage	<input type="text"/>	Off site date	<input type="text"/>	<input type="text"/>
		Current Task	Unknown	
		Status	New	

### Self Service Portal

PlanManager's Self Service Portal is a website that allows the customer to report information about damage (including photos) and to schedule an appointment for an estimate, to make an appointment for a repair and also to follow up on the repair of his or her vehicle. The website can be accessed from PC, Mac, laptop, tablet or smartphone.

An adjustment was made to the self-service portal so that from this release it is also possible to let customers add photos to a job without having to make an appointment for this.

# Versions

The customer can upload photos based on his/her license plate + job number. These are placed directly in the PlanManager job.

The image shows a form titled 'Add pictures'. Below the title is a paragraph of text: 'For this functionality you must have a job number that is linked to your registration plate. The job number can be found in the e-mail the repairer has sent to you or has communicated otherwise. If you do not have a job number, please contact the repairer. Thank you!'. Below this text are two input fields. The first is labeled 'Registration plate \*' and the second is labeled 'Job number \*'. Below the first input field is a red button labeled 'Reset'. Below the second input field is a blue button labeled 'Next »'.

To activate this option, you can contact our helpdesk via [support@insypro.com](mailto:support@insypro.com). More information about the operation / possibilities of the self-service portal can be found in our FAQ.
