

# Installation/Configuration

## How can I change the language of the menus?

For this feature, you need to have the rights of an administrator.

All languages can be found under System → General settings → Language settings

# Installation/Configuration

There you will find the following page:

# Installation/Configuration

## Active languages

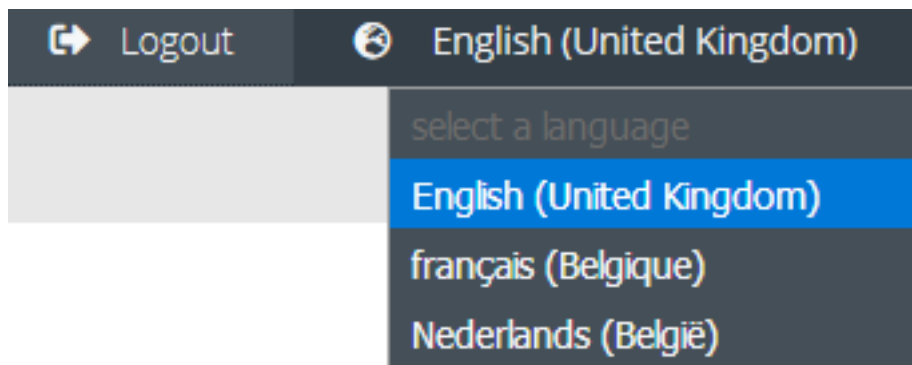

- ☒ English (United Kingdom)
- ☒ français (Belgium)
- ☒ Nederlands (Belgium)

## Language list

Deutsch - German (de) <input type="checkbox"/> DE - Germany ()	Español - Spanish (es) <input type="checkbox"/> ES - Spain ()	français - French (fr) <input type="checkbox"/> FR - France () <input type="checkbox"/> LU - Luxembourg ()	Italiano - Italian (it) <input type="checkbox"/> IT - Italy ()	ქართული - Georgian (ka) <input type="checkbox"/> GE - Georgia ()	Nederlands - Dutch (nl) <input type="checkbox"/> NL - Netherlands ()	język polski - Polish (pl) <input type="checkbox"/> PL - Poland ()	中文 (Zhōngwén) - Chinese (zh) <input type="checkbox"/> CN - China ()
---	--	--	---	---	---	---	--

This page can be different as languages will be added.

The languages that are checked are still available in the dropdown menu of the available languages:

If you want to add a language, you place a check mark next to the desired language, and it will be available in the forementioned dropdown menu.

Unique solution ID: #1933
