

# **Workshop app - Can I scan the ticket of a job so that I can quickly take pictures for this job?**

On the overview screen there is a button at the top to scan a job ticket. This will open a barcode scanner with which you can scan a job its ticket. The ticket can be found on PlanManager: Job → Print → Job ticket. When the job is found on the device, a camera will open with which you can take pictures. These pictures will be directly uploaded to the job once you close the camera.
